Stage 1 – Moderate Water Conservation Condition Restrictions Imposed

Stage 1 of the City of Kerrville's water management plan will become effective at 12:01am on August 18, 2010. These restrictions are imposed in order to conserve water. The City is taking a proactive approach to ensure supplies are sufficient should there be a prolonged period of dry weather.

The seven-day average water demand has exceeded 65% of the City of Kerrville's safe operating capacity, thus initiating the Stage 1 water conservation restrictions. The City of Kerrville is consuming an average 5.766 million gallons per day.

Guadalupe River flow is currently at 39 cubic feet per second and falling daily. During these summer months when the weather is excessively hot, the City asks citizens to reduce water use for non-essential purposes. Below is the City watering chart. Please note: In Stage 1 automatic irrigation and sprinklers can only be used on certain times and dates designated by the last numerical digit in the property address.

Kerrville is under ***Stage 1 – Water Conservation Restrictions.***

HOW & WHEN YOU CAN WATER					
Year Round Water Conservation (Mandatory)	**Stage 1** > 65% SOC 7 Day Avg.	**Stage 2** > 75% SOC 7 Day Avg.	**Stage 3** > 85% SOC 7 Day Avg.	**Stage 4** > 95% SOC 7 Day Avg.	**Stage 5** > 100% SOC 7 Day Avg.
