Guidelines

*The Community Tree Program emphasizes the use of native trees that are best adapted to our climate. Trees that are susceptible to disease and require high maintenance and watering are excluded.

*The tree donor and the City of Kerrville will collaborate on a suitable tree variety (from the list provided) and placement within a municipal park/open space.

*Trees are best planted in the fall or spring, depending on the proper planting time for the variety of tree selected.

*Trees selected will be no less than 3" caliper (diameter) to insure the best chance for survival.

*If a tree dies within 5 years of original planting, the Parks and Recreation Department, after evaluation, will replace the tree at no additional cost. A different variety of tree may be replanted depending upon this evaluation.

Community Tree Program

The City of Kerrville Parks and Recreation Department offers an opportunity for recognition through the donation of a tree. This program allows the donor to honor individuals, groups, or events and be supportive of, and beneficial to, Kerrville's parks system, public places, and urban forest .

*Pecan**	+40'	Erect/Pyramidal	Fast	+40
Texas Redbud	15'	Rounded	Slow	25-50
*** for riparian areas only**				

Other varieties will be considered based on location and appropriateness.

Procedures

Donors are responsible for tree purchase. The donor and the City will cooperatively select a tree from a reputable source. The City will deliver/arrange to have delivered the tree from suppliers in/near Kerrville to the planting location and will install and maintain the tree. The names of donors and those being recognized will be displayed on a plaque in the Parks and Recreation Headquarters.
