City to remain in Stage 4 Water Conservation measures until maintenance completed on three wells

Kerrville, Texas (Oct. 12, 2023) – The Headwaters Groundwater Conservation District announced Wednesday that it will return to Stage 3 Water Conservation measures effectively immediately after operating at Stage 4 since early August.

The City of Kerrville moved to Stage 4 measures on Aug. 24 and capitalized on the reduction in water demand to perform maintenance on two of our groundwater wells and one of our ASR wells. This type of work is usually done in the winter, but because of the drop in water demand the work was accelerated. After pulling

two of the pumps and inspecting the column pipe, it was determined that a new column pipe and pumps were needed. The city is working with a pump supply to secure the required

materials. Because that maintenance has not yet been completed, the city will remain in Stage 4 until a satisfactory solution has been implemented in the next few weeks.
