Traffic signals to be replaced at Water Street/Earl Garrett intersection

Kerrville (March 18, 2024) – The City of Kerrville’s contractor, Elecnor-Belco, will begin dismantling the traffic signals at the intersection of Earl Garrett and Water Street beginning Tuesday, March 19. The traffic signals will be replaced temporarily with stop signs until the new signals are emplaced. Expect significant traffic delays at the intersection while the signals are being taken down.

The improvements to pedestrian safety and signalization began Feb. 5 and are funded by the

Texas Department of Agriculture for a Texas Community Development Block Grant Program (TxCDBG) grant. The project consists of a full intersection and traffic signal rebuild at Water and Earl Garrett to include new curb ramps, new crosswalk, updated pavement markings, and new pedestrian and traffic signal equipment.

During this project, vehicle and pedestrian access to local businesses will be maintained, with any road closures indicated by temporary street signage.

The City of Kerrville apologizes in advance for any inconvenience caused, and we thank all citizens for their patience as these improvements are completed. Please feel free to contact our Public Works department at (830) 258-1221 with any questions or concerns.
