### **City moving to Stage 3 Water Conservation Measures**

**Kerrville, Texas (May 29, 2024)** – Due to severe ongoing drought conditions and significant declines in Guadalupe river flows into Nimitz lake, the City of Kerrville will move from Stage 2 to Stage 3 Water Conservation Measures effective at 12:01 a.m. May 30, 2024. The city will continue monitoring water supply capacities and weather conditions with hopes of improvement in the near future.

Stage 3 Water Conservation Measures are listed in the graphic below. The city offers water stage conservation magnets free of charge at City Hall showing each stage with water times and dates. A full list of Stage 3 requirements along with water conservation strategies can be found at the City of Kerrville website at <https://www.kerrvilletx.gov/889/Water-Conservation>.

Moving forward, here are a few of the top water conservation tips:

- Turn off the water when you are not actively using it.
- Check for leaking outside hose faucets.
- Leave floats in pool during the day to minimize evaporation.

- Use your water efficiently by hand watering plants and lawn areas in need.
- Check sprinkler spray directions and make proper adjustments.
- Do not over water lawns or potted plants.

For more information, please visit the City of Kerrville website at <https://www.kerrvilletx.gov/> or call (830) 257-8000 for general water or Stage 3 questions.
