City Encourages Water Conservation with Rebates

Kerrville, Texas (April 4, 2018) - The City of Kerrville is offering a \$75 rebate to water customers who replace their high-flow toilet with a new low-flow model.

Lavatory use can account for up to 50 percent of the indoor water usage in a house. Replacing a pre-1994 high-flow commode with a new low-flow one can save an average of 9,600 gallons a year.

“To encourage home and business owners to replace those high-flow units with low-flow ones, the City is offering a \$75 rebate applied to your water bill for each one replaced,” Assistant Director of Public Works Scott Loveland said.

The application and details of the 12 month pilot program can be found at <http://www.kerrvilletx.gov/DocumentCenter/View/32154>

For more information, contact the City at (830) 257-8000.
