TEXAS FLOODS PROGRAMS

RELIEVE. RESTORE. EMPOWER.

WHO WE ARE

Global Empowerment Mission (GEM) is a disaster relief organization dedicated to delivering the most aid to the most people in the shortest time, with the lowest cost to donors.

GEM was founded in 2011 to provide hope with a new model for disaster and humanitarian aid response. GEM meets modern crises head-on with an innovative, adaptable, and scalable approach.

When disaster strikes, pre-positioning resources allows GEM to immediately deliver necessary aid from one of our branches around the globe, through established distribution networks within the first 48 - 72 hours.

FAMILY NECESSITY KITS

Our Family Necessity Kits are provided after every disaster and are a key component of what GEM is. We are prepositioned with our boxes in order to respond quickly after a disaster.

BSTRONG CASH CARDS

In collaboration with Bethenny Frankel's BStrong, GEM is able to provide those affected by a crisis with immediate financial assistance.

TOOL REPLACEMENT

Our tool program provides brand new tools for trades workers who have lost their equipment after a disaster. Natural disasters cause significant destruction, and empowering trades workers allows for community rebuilding efforts to begin quicker.

SMALL BUSINESS GRANTS

For small business owners, the loss of their income, creative outlet, and hard work is devastating. Within our small business grant program, GEM has been able to provide financial assistance to cover rebuilding, relocation, tool and equipment replacement.

DRYWALL PROGRAM

Our drywall program provides free drywall, mud, and tape to flood-affected homeowners in Kerr County, offering essential materials to help repair and restore damaged homes.

For more information on our programs, contact
programs@globalempowermentmission.org

Needs vary depending on different disasters. GEM works effectively to most accurately serve affected communities in the most necessary way through programs. Please note, the activation of a program is based on many factors and may not be implemented after every disaster.
